Dear KHAJA AHMED ALI

Congratulations on successfully completing the NDG Linux Essentials course in the Cisco Networking Academy. By completing this course you are now prepared to earn the Linux Essentials Professional Development Certificate from the Linux Professional Institute (LPI).

Today's job market is competitive, but the rewards are worth it. With employers reporting they are paying salaries well above company norms, giving out bigger bonuses and offering flexible schedules, there has never been a better time to have strong Linux abilities. Verifying your skills with a professional certificate can be a great way to stand out from other candidates, by proving you have the technical abilities required for the job. Become a stronger prospect in the job market by pairing our certificate with other industry recognized certifications such as Cisco Certified Network Associate (CCNA).

Obtaining the Linux Essentials Professional Development Certificate shows that you:

- Understand the Linux operating system
- Have demonstrated the ability to navigate a Linux system
- Can execute the power of the Linux command line
- Possess knowledge of Linux security and file permissions
- Have the motivation to advance your IT career

To help you accelerate your career we'd like to offer you 20% off of the Linux Essentials Professional Development Certificate today. To get started, visit https://www.lpi.org/nsacad1.

We hope you'll continue your Linux studies with the NDG Introduction to Linux I course. This course prepares you for the LPIC-1 101 Exam, the first of two towards the LPIC-1 Linux Server Professional certification from the Linux Professional Institute (LPI). The LPIC-1 certification will show you have the in-demand Linux skills that employers are seeking.

Again, congratulations and we wish you continued success!

Sincerely,

C. Matthew Rice
Executive Director
Linux Professional Institute

Subject: - Internship opportunities in AI/ML.

Dear Sir/ Madam,

We are happy to inform you that Career launcher is offering AI-ML Internship which is a great way for any student to start a data science career. It is designed to both test knowledge and to give an experience of a real world data science problem. In this 8 week online Machine Learning internship program. Students will receive a series of assignments related to the world of finance (stock market analysis) that incrementally solve a real world machine learning problem in a modular format. The programming will be done in Python using machine learning libraries from Scikit-Learn (e.g Pandas, Matplotib, Seaborn, etc). Student will implement machine learning algorithms of Clustering. Regression and Classification.

All problems are to solved by students and solution notebooks have to be uploaded online. At the end of submission of all modules, a student will receive an internship completion certificate upon passing a video interview with an assessment panel comprising of industry and data science experts.

Eligibility: The Machine Learning Internship is meant for students who have a background in programming or are keen to learn programming language and solve business problems using AI/ML. It is ideal for students of Engineering (any discipline), BCA, MCA, MTech and BBA/MBA and it can be done in any year of graduation. Python language will be used for solving all problems. A crash course on Python will be provided in the portal and students can cover more topics from many free resources on the web.

B.Tech

Application Process: Student are required to visit the Career Launcher – AICTE Internship page on https://www.careerlauncher.com/machine-learning/aicte and register themselves on the portal.

Fees: Free of cost.

Learning Support: Students can access video and live online classes of learning modules for Python and Basis of Machine Learning by paying additional fees on www.careerlauncher.com. Live online classes will be scheduled once a week and recordings will be available for replay.

Date and Duration of Machine Learning Internship: This is an online Machine Learning internship that can be completed in 8 weeks or even earlier by students who can move at a faster pace. Since it is an Online internship, this can be started right away. It should ideally be done during vacations and submissions will be accepted till Aug 15, 2019.

We request you share the information with all your students. This internship is as per AICTE internship policy guideline. Colleges/ Universities are requested to treat this valid for all academic purposes.

Computer Networks

A computer network is a set of computers connected together for the purpose of sharing resources. The most common resource shared today is connection to the Internet. Other shared resources can include a printer or a file server.

This course deals with fundamentals of computer network. It deals with various network models, types and OSI layers. This course provides uses of computer network, role of seven OSI layers etc.

At the end of the course, the students will be able to build an understanding of the fundamental concepts of computer &computer networks, advanced networking concepts, network standards & protocols, mobile phone networks and network security etc.

Intro

Anand More is a Maintenance Engineer at the Computer Centre, Devi Ahilya Vishwavidyalaya, Indore and teaching in UG and PG courses at School of Computer Science & IT, DAVV. He has exemplary knowledge in the field of Network administration and for a past decade he worked for IT Industry and Academic institutions in establishing and developing large size computer networks. He is a core member of "Network Security Laboratory" committee at SCSIT under DEST-FIST scheme and had established a lab for SCSIT. He has also technically coordinated online examinations at large scale. He is an organizing committee member of various conferences & workshops conducted in the University. His research papers are published in National & International journals and conferences. Performance enhancement of IT Infrastructure is his major area of interest and research. He has done M.Tech, MCA and M.Sc. in Electronics & Communications.
