POLICY DOCUMENT FOR SUPPORT OF DISABLED PERSONS

Human life is unpredictable and uncertain hence chances of getting victimized by any natural or accidental calamity and may come go through disability phase. Especially, the victim category includes the elderly, ill, pregnant, obese, children, persons with fracture or with luggage etc. as such every one of us may pass through such phases at one point or the other. However every one has their constitutional rights to live with dignity. Therefore, Accessibility of the professional as well as social resource won't be an aspect of sympathy but is very much of every individual's constitutional right. Therefore, as a professional obligation as well as a societal commitment the educational infrastructure should implement barrier-free design to facilitate the available resources. But many a times we observe most of our buildings today remain inaccessible to many and it could be unintended largely due to the lack of conscious efforts, concerns for the disabled and lack of basic information on what constitutes an accessible design. In modern infrastructural design provision of only ramps is not remained a synonym but it needs to involve many more aspects. These neither implicate any additional infrastructural demand nor additional cost, if integrated right from the initial design of the infrastructure.

With this assertion, it is very fundamental to procure a comprehensive reference document that guides about the necessary provisions made available especially the space design for "Divyangen". Many a times the barriers for "Divyangen" become a major obstacles in societal life. However, everyone of us must realize that at some stage of life one may face barriers challenge. Anyone of these, a small child, an elderly or infirm person, a pregnant lady, the temporarily disabled, all are vulnerable to barriers. Therefore, the peoples are classified according to affected by barriers - - Wheelchair users - People with limited walking/ movement abilities - People with visual impairment or low vision - People with hearing impairment - Elderly and infirm persons - Pregnant ladies - Children - People with temporary disabilities. But most of the times these barriers make an environment unsafe and cause a high level of difficulty to the user. But more importantly, barriers causes spaces out of reach, denies people the opportunity of participation in various spheres of life. This ranges from education, economic, social, cultural and many other activities. This loss of opportunity is not only a loss for the person concerned but also society's loss which misses out on their contribution. Simply put, a barrier causes exclusion and its removal is necessary for ensuring inclusion and participation of all in society. The goal of education for students with or without special needs is to prepare them

for a happy, productive and useful civil life. When education has become the right of every student whether with disability or without disability, it is important that every student of the institute going age receives education in the manner he is receptive to. To achieve this aim, education of all students including special students needs to be given importance. They must be provided optimal support. Special students need this all the more to supplement their different talents. Granting Extra Time The Controller of Examinations on the recommendations of a Govt. Medical Officer not below the rank of an Asst. Surgeon and the Principal has the power to grant extra time to differently abled candidates for answering papers at University examinations. Extra time of 30 minutes shall be granted to such students to write the examination of 3 hours duration with proportionate reduction of extra time for papers of shorter duration with reference to wide letter no. F.No. 16-110/2003-DD.III dated 26th February, 2013 also university Letter to constituent colleges 94/D/ACad-III/2014 dated 12-08-2014 and Letter 650/D/ACad-II/2015 dated 07-04-2015. Use of Scribes The Controller of Examinations has the power to allow scribes for blind candidates and a small category among disabled candidates whose disability incapacitates the student from writing based on the recommendations of a Govt. Medical Officer not below the rank of a civil surgeon and the Principal. Such students shall be seated in a separate room. The maximum number of students belonging to the above categories allowable into an examination hall shall not exceed five. An invigilator shall be allotted to supervise them (Ratio 1:5) Appointment of scribes In case of students who are eligible to avail of the services of scribes, the University shall authorise the Principal to appoint scribes according to the following conditions. The scribe shall not be an employee of the college/centre where the examination is conducted. The scribe shall not be a relative of the student who is appearing for the examination. The educational qualifications of the scribe shall be less than those of the student. A pro forma with declaration in the format given in Appendix 4 shall be obtained from the scribe. The proforma signed by the scribe shall be forwarded to the University.
